About the Commission

Welcome to the Virginia Workers' Compensation Commission's (VWC) website.

The Commission is headed by three Commissioners and an Executive Director. The Commissioners are chosen by the General Assembly and serve six-year terms. Wesley G. Marshall, R. Ferrell Newman, and Robert A. Rapaport currently serve as Commissioners. The Commissioners elect a Chairman for a term of three years. Mr. Marshall is currently the Chairman and Evelyn McGill is the Executive Director.

Executive Director's Message:

The Commonwealth of Virginia is a wonderful place to live and a great place to work and raise a family. Owning a business in our state also offers various opportunities to develop, grow and prosper as an entrepreneur or business. Whether you are an employee of a business or an owner of a company, VWC is responsible for carrying out the requirements of the [Virginia Workers' Compensation Act](#), while administering Virginia's workers' compensation program, meeting legal requirements and providing various protections. Most employers doing business in Virginia and most employees working in Virginia are covered under the requirements of the Act. VWC ensures compliance with the Act and all workers' compensation requirements through its mission and agency operations.

VWC SPOTLIGHT

Public Access: § 65.2-605 (F)

The Commission uses technology to increase accessibility to the medical fee schedule.

Medical Community

There are six regions for medical services in the Commonwealth. The MFS look-up tool is programmed to assist the public by identifying the region by simply entering the first three digits of the zip code for the location of medical services.

Find Your Region

Enter the **first three digits** of the zip code for the location of service.

Zip Code

###

Search

To identify regions for services rendered outside of VA, refer to [VA Code, Title 65.2, Chapter 6, Section 65.2-605.1, G](#)

Reimbursement is equal to the total units times the Conversion Factor from the table below

Total units are calculated as the sum of base units from the table below plus time units plus physical status units from the table below

Qualifying circumstances are reimbursed per service and a list of these CPT codes is in the table below

These codes need to be reported in addition to the code for the primary anesthesia procedure

Anesthesia Conversion Factors

Access Considerations

Browser Requirements

To use this application, your browser must have JavaScript enabled.

We recognize that our users may have various Internet Browsers and Operating Systems or devices. We like our visitors to have the best possible experience when using our applications. The Virginia Workers' Compensation Commission recommends Google Chrome for best results or any other modern web browsers with HTML5 and CSS3 compatibility.

NOTE: If you are using Microsoft Internet Explorer and still encounter problems, please verify that your browser is not operating in Compatibility Mode.

Disclaimer

The VWC Calculator Application is a reference tool provided by the Virginia Workers' Compensation Commission. Ultimately, the amount of benefits due will be determined by the Commission on a case-by-case basis, according to eligibility and corresponding statutes.

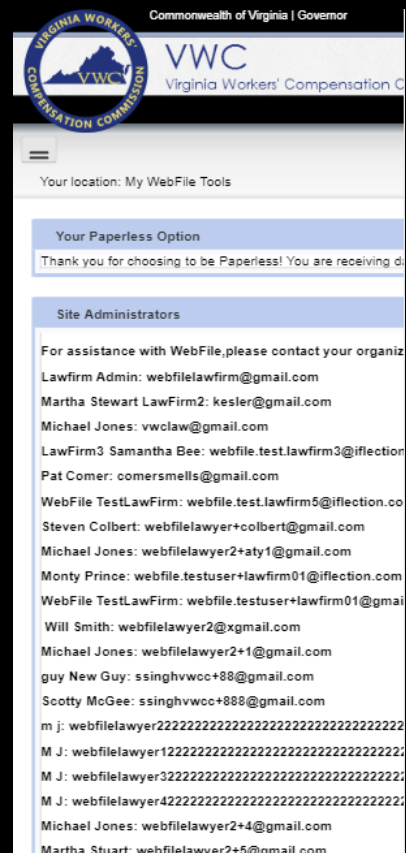

Questions

WEBFILE REIMAGINED

Giving our application a facelift and putting it on a new diet

WEBFILE TODAY

WebFile as seen on an iPhone X

GOALS

- Provide a path for today and tomorrow's technology
 - The web has grown so fast. We should grow with it!
- Give a richer customer experience
 - Intuitive user interface
 - Focus on speed
 - Don't leave mobile devices out
- Increase productivity

TECHNOLOGY CHOICES

- Google Angular
 - Google's flagship and enterprise web application framework
- Google Angular Material
 - User interface components built on Material Design principles
- RESTful (web) services
 - Making the web our universal language

Angular

Material Design

REST services

WHY ANGULAR AND MATERIAL DESIGN?

- Angular
 - Develop for multiple device types
 - Performance/Speed
 - Increased developer productivity
- Material
 - Built on Material Design principles
 - Focused on usability
 - Tested and designed by Google

WHY RESTFUL SERVICES?

- Stateless
 - Inheritably scalable
- Uniform Interface
 - Consumable from a multitude of clients
- Easier to develop, test, debug, and deploy

COOL...BUT WHAT'S IT LOOK LIKE?

Let's take a
look!
